

Commtouch Version 5.0 Enterprise Anti-Spam Solution

Install it at breakfast — be a hero by lunch

1. Because we catch it better

- RPD™ technology – looking for the “nature” of spam (massive outbreaks)
- Protect your investment with a durable technology
- Detects any language, any format; including Image & Attachment Spam
- No content analysis – no false positives
- Recognized innovator by industry analysts (IDC & Osterman)
- Validated by competitors – over 50 messaging security vendors are OEM’s

2. Because we catch it first

- Real-time proactive approach – detecting malware *before* it reaches your network
- Large scale detection center – looking at + 1 Billion messages daily
- Immediate detection of new Virus outbreaks; “Zero Hour Protection”
- Bottom line performance: over 97% detection rate

3. Because we make it easier

- Under 30 minutes deployment process
- Perimeter defense – spam doesn’t even reach the mail server
- Maximum flexibility – fits into every network, supports any mail-platform
- No need for heavy appliance that could turn obsolete in a year
- No risk to privacy and mail flow
- “Spam Analyzer” evaluation stealth mode – analyze your spam without affecting any user

4. Because once it’s installed, you don’t lift a finger

- Fully automated – detection, classification and filtering
- Once set – no IT involvement is needed
- Single user provisioning – no change in working habits
- Gradual deployment if needed – by users, groups or domains
- An elegant solution to the problem – without creating any new ones

5. Because we provide the best user experience

- Full user empowerment, without user installation
- You don’t download the spam – just glance at the headers
- Fully operational with any email application
- IT Administration can tailor end user involvement
